

Miscellaneous medical services

Range of motion, back and extremities up to a maximum of \$35

- When available medical information does not include this information, purchasing a range of motion analysis versus a general medical exam is more cost effective. When a rehabilitation counselor purchases a general medical exam, the range of motion information is to be provided by the examining physician. The general medical exam with its range of motion provides an alternative to an orthopedic specialist exam.

Visual

- | | | |
|---|-------|-------|
| • Basic eye examination by an optometrist | \$60 | OPTOM |
| • Eye examination and diagnosis by an ophthalmologist | \$85 | OPHTH |
| • Low vision examination | \$125 | LVEX |
| • Goldman Visual Field examination | \$70 | GOLDM |

Eyeglasses

- Kansas Social and Rehabilitation Services (SRS) prudent person concept with maximum rate of \$100 for frames. May use the WG modifier and pay "as billed" if needed.

Mental health

Mental Health Centers are paid at the same rate as other providers for the same services.
